

Solve the diagnostic puzzle

Advanced PC based diagnostics to keep you working now and in the future

cypher

**Tuning a car's engine used to be simple, you connected it to your big old engine analyser and gave it a Crypton Tune. Is today's vehicle technology making you feel more Crypton Factor than Crypton Tune? Crypton are proud to present the very latest in vehicle diagnostic technology, if you need to crack a fault code, you need Cypher**

Windows based platforms are becoming an increasingly common sight in workshops today. They offer an ideal platform for a wide variety of diagnostic and information software. The CYPHER system from Crypton can come neatly packaged as a complete kit that can include either the Quadpad, a standard laptop or buy the communication module on its own to be used with your own laptop. How you buy it is up to you....

**Designed and manufactured by Crypton, a company that's been tuning and diagnosing for nearly 100 years**

Both European and Asian vehicle manufacturers are covered with an impressive depth of coverage. Using a Windows based operating system, navigation around the system via icons and menu screens are straight forward. Choosing the manufacturer, model and engine management system from the menus Cypher will tell which connection lead to use (plus any adapters for older vehicles) and the location of the diagnostic socket.

The system will display and clear fault codes, and extract live data. Live data is a particularly useful feature for a more in depth analysis of vehicle problems, Cypher has particularly easy to use live data functionality. The menus will list available systems that can be accessed and the data can be displayed either numerically or as a histogram. This graph format plots the operation of a sensor over a short period of time. You can view up to four plots at any one time in this mode, and this system is able to take 'snap shots' of the live data.

## Phone to arrange a demonstration

- Key/Remote Program
- Climate Control
- SRS - Airbag
- Service Light Reset
- Steering
- Security
- Instruments
- Seat electrics
- Door Modules
- Interconnection
- Engine Management
- Park Distance
- Injector Configuration
- Lighting
- Suspension
- Tyres
- Transmission
- ABS Braking
- Body control Unit
- Particulate Filter
